

Children's Interests

Before the end of term the children continued to enjoy the outside environment and looked at and learnt about different insects and bugs.

During the summer break they have been creative in making models and art pieces for the displays. They have also been developing their gross motor skills outside and learning about directions following the arrows on the ground with the bikes and cars.

Eco Update

Now that we have received our Eco Schools Green Flag Award with distinction, Eco Schools have chosen us as an example of good practice for the area about Global Citizenship on their website. They see us adopting Harvey the Hippo in a sanctuary in Zimbabwe as an example of Global Citizenship that is meaningful to children. You can follow our story here:
